

Symbol Alignment Investigation

Local coordinate system

Drawn by: B Mutton 2019

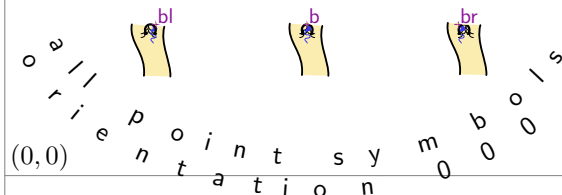

Compiled: Therion 5.4.4+094ac85 (2019-11-14) on 1 Dec 2019

Legend

	temporary survey station		flowstone choke
	entrance		water flow
	wall		

alignment is correct if -orientation is zero or undefined

default entrance symbols respond to -orientation but my custom entrance symbols do not. They are aligned correctly though

water-flow and flow'choke have alignment reversed with -orientation 210
